DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on 29 February 2005 have been fully considered but they are not persuasive. Because claim 1,17 and 20, are reads of allowed claims 1,15 and 19, of U.S. Patent # 6,320,769 both sets of claim are drawn to a power converter to convert direct current power inputted from a power supply to alternating current power and supply the alternating current power to commercial power system which is grounded, a detector for detecting ground fault, a controller for controlling operation of converter, inverter, switch including voltage control such as holding voltage of converter. Further both sets of claims use solar battery as a power source that is varying input. In regards to claims 3-10 of instant application recite the same subject matter of claim 9 of Kurokami's Patent (769). In regards to claims 11-13 and 23-25 of instant application recite same subject matters of claims 2-3 of Kurokami's Patent (769) and in regards to claims 16 and 19 of the instant application recite same subject matters of claim 20 of Kurokami's Patent 769. For examiner's position regarding allowable subject matters indicated during the phone interview upon further review claims were determined to be not allowable and hence the examiner changed his position.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,320,769. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of the claims are drawn to power converter for converting direct current power to alternate current power and supplying the alternate current power to a power system, which is done by detecting ground fault, adjusting output voltage, controller records information related to ground fault in a memory, controller has a setting unit for setting ground fault condition of the detector, a ground fault interrupter, solar battery array, power supply is a solar battery.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
